Assembling your new **SEAT** and **TANK PANNIERS**:

The **Seat** and **Tank Panniers** are shipped with out the stiffening inserted, to save space and keep the costs down... so you'll have to do a little work on your own... Don't worry! It's easy!

Let's start with the **Tank Panniers**...

In your package of the panniers will have 6 pieces of close cell foam; two of each size:

A= the inside and outside... next to the bike and away from the bike

B= the lid... or top before the roll down

C= the front and back ... towards the front of the bike and towards your knee

Looking inside you will find that there are 6 pockets in the lining that are closed by Velcro... Pry them open and slide the appropriate foam insert into each pocket and stick the Velcro back together and forget you had to work soooo hard!

The **Seat Panniers** work the same way. The shapes of the foam pieces are different but there still are 6 and 6 pockets to put them in. There is only one trick: the one long foam piece slides in the back (towards the knee) side and curves around to form the bottom. I know it's not that easy but keep pushing it WILL fit. The sides and top pieces are obvious.
