

**Marsee 20 Liter Rear Bag features and Benefits**

1. Total of four D rings on top of lid. Also provided (Not shown) is a cord with cord lock so cord and D rings may be used to externally mount objects to Rear Bag.
2. Molded handle with straps is removable making it easier to "lash down" objects with the D rings, cord and cord lock.
3. Belt loops with reinforcement rivets help place load on sidewalls of bag and not on lid.
4. Water proof zipper helps repel moisture trying to enter bag.
5. Reflex, reflective fabric is used on all four sides of bag for low light conspicuity.
6. Reflective piping is also used on all for sides of bag for low light conspicuity.
7. Vertically mounted triple layer "hook and loop" is on four corners of the bag to permit bag to be mounted to rear racks. This is achieved by lacing the middle layer of "hook and loop" under one side of a rack cross bar and bringing it back up the other side. Press the "hook and loop" to the "hook and loop" nest to the bag, then take the outermost strap and press it down onto the middle layer of "hook and loop" again and it creates a very strong attachment.
8. Hidden underneath the side pockets are "drop down" straps with connected male and female buckles, as well as a "J" hook attached to each strap. This permits the bag to be mounted to a bar by wrapping the straps around the bar and connecting the buckles. Or the "J" hooks can be placed under a substantial member and tightened down on all four straps to secure the bag.
9. There are four external pockets on the Rear Bag. The zippers run partially down both sides of the bag to create a wide easy entry into the pockets.
10. Two D rings are mounted externally on the Rear Bag so the removable shoulder strap may be mounted (Shoulder strap not shown but comes standard).
11. Internally the bag uses waterproof silver fabric which is seam sealed for additional prevention of water entry. Internally under the lid is an I.D. card and I.D. card holder. Around the perimeter of the opening is an internal storm flap to help repel water entry. A rain cover with cord and cord lock to secure rain cover to bag is also included.
