RPW Motorcycle Accessories Introduces New H2W Map Pockets

Indianapolis, IN, December 3, 2009- RPW Motorcycle Accessories introduces the new H2W Magnetic and Quick Release Map Pockets. The new Map Pockets are a simple, economical way to carry a map on your motorcycle tank when a traditional tank bag with map pocket is not needed.

Designed and manufactured in the USA, the new H2W Map Pockets utilize the same rugged material used in the H2W Products, along with the innovative mono swivel buckles and magnets used in the Marsee Tank Bags. The Map Pockets are made with no metal parts to scratch bikes and the bottoms are covered in a non-slip, non-scratch rubber coating. Hook and loop map pocket openings keep dirt out while allowing quick and easy access to the pocket. The map pocket cover is made from rugged, marine-grade plastic. Elastic penholders on both sides make it easy to always have a pen or marker quickly available.

The Magnetic Map Pocket has four magnets to keep the bag in place on the bike. All four magnets are contained in separate sturdy compartments. For those who want the magnetic version (but somehow don't trust magnets), there is a snap buckle on a strap that can also attach to the bike for extra security. The Magnetic Map Pocket measures 9.5" x 15" with a 7.125" x 8" clear map pocket size.

The Quick Release Map Pocket mounting system is well known and fully tested on Marsee's newest tank bag, the 12L Tear Drop Tank Bag. For easy and secure mounting, there are two mono swivel buckles at the top with a strap connecting the two and one mono swivel buckle at the bottom with a loop on one end. The Quick Release Map Pocket measures 17.5" x 9" with a 10" x 8" clear map pocket size.
