Marsee 10L Corona Mount Bag for BMW K1200LT

Indianapolis, IN, January 23, 2009- RPW Motorcycle Accessories Division introduces the Marsee 10L Corona Mount Bag for BMW K1200LT bikes. The Marsee BMW K1200LT kit comes with the Marsee 10L Rocket Pocket Tank Bag, along with the corona mount and hardware necessary to mount this bag onto the oddments box lid on the BMW K1200LT.

The Marsee 10L Rocket Pocket Tank Bag has a polycarbonate lid to provide ultra clear transparency to maps or electronic gear stored in the Marsee tray. The Marsee tray helps protect such items from the elements of nature and places such items at the finger tips of the operator. The Marsee tray has two egress ports from the bottom of the tray plus two exit ports at the front of the tray. An optional Powerlet Electrical Kit can be added to bring power into the bag. The interior of the bag is lined with silver, waterproof fabric to help prevent the "dark-hole" effect.

Mounting the 10L Rocket Pocket Tank Bag is fairly easy and requires only the bottom Corona Ring to be mounted to the oddments box. The oddments box lid has a metal backing plate that is the perfect mounting platform for the Marsee easy-on, easy-off Corona Mount. LT owners will have to drill four small holes in the oddments box lid and then bolt the corona ring to the lid using the enclosed hardware. The bag then simply twists on and off!

Thomas Volk, Company Owner and 2003 BMW K1200LT rider, states, "Like every other LT owner has discovered, tank bag options have been very limited! Late last fall, we acquired Marsee Products. I have used Marsee bags over the years on several bikes and am really excited to have created this kit, which allows one of Marsee's most popular bags to be mounted on LT bikes."
