

The Dog's New Trick

Road Dog Trailers' all new Rally Wagon is the only motorcycle trailer boasting a removable duffel bag. With 8-cubic feet of storage, the duffel can be easily detached and taken into your hotel room or tent. And with the duffel removed, you now have an

all-purpose utility trailer that can handle almost anything you want to haul. The Rally Wagon features Road Dog's independent torsion suspension, LED lighting and a spare tire as standard equipment. For more information, go to www.roaddogtrailers.com

Sport's Pages

With over 27 years of experience in the sportbike aftermarket, Phillips Motorsport Group offers over 10,000 selections of performance parts, custom chrome, billet, and accessories. Phillips Motorsport Group products are available at over 4,000 Lockhart Phillips USA dealers nationwide. To order your own 2009 Phillips Motorsport Group Catalog, go to www.LockhartPhillipsUSA.com

Eye Candy

7eye has expanded its moto-specific offerings with the introduction of the Cape, a generous, high-wrap frame featuring adjustable-length "hook"

temples and Airlock, its new proprietary all-condition design. The Cape's adjustable temples enable riders to customize the fit of eyewear under their helmets while the Airlock shield blocks wind, glare and airborne irritants. The Cape line includes a full range of NXT®, virtually shatterproof lenses including the photochromic 24:7 Original and 24:7 Contrast, and the color-enhancing Re-ACT Copper and Gray. For more information, visit www.7eye.com

Flash of Brilliance

F2P's signature technology, the Flash2Pass, is modernizing remote-controlled garage-door systems. The device, a transmitter hidden on the motorcycle, opens and closes a garage so riders no longer have to stop and fumble for a manual push-button opener. A simple double-click of the high beam switch remotely opens or closes the garage door. The Flash2Pass is available for all vehicles with a 12-volt electrical system and is compatible with all door openers made since 1982. For more, check out www.f2ptechnologies.com

Wing Lights

Honda Gold Wing owners can now easily take advantage of PIAA's wide offering of HID and halogen driving and fog lamps thanks to new, specially designed brackets that affix the lamps underneath a Gold Wing's rear view mirrors. Lightweight, strong, and easy to install, the PIAA Honda Gold Wing Mirror Brackets utilize the existing fastener under the stock mirror. For more information, visit www.piaa.com

Quick Getaway

RPW Motorcycle Accessories Division introduces the new Marsee 12 Liter Tear Drop Tank Bag utilizing for the first time "Quick Release Mono Buckles." These unique fasteners permit three different mounting methods for a natural fit on almost any tank with a gradual slope. Compression cords and locks on each side allow up to four inches of expandability. The interior is made of a waterproof silver fabric that enhances the visibility of dark objects within the bag. Strong 1680-denier waterproof fabric is used externally, and all hardware is top quality. For more, see www.racerpartswholesale.com

Undercover Work

Alpinestars' Summer Tech Performance warm weather underwear forms an effective and practically seamless base layer designed to keep you cool and comfortable under your summer riding suit. A muscle supporting compression fit is employed to aid in reducing fatigue. In addition, moisture-wicking Dryarn® technology helps ensure that the utmost comfort is maintained. Visit www.alpinestars.com

Lighter and Quicker

Dale Walker's Holeshoot Performance BMW F800GS slip-on muffler is just what the doctor ordered to give your adventure bike a dose of added zip, a nice weight reduction and a sweet exhaust note. The 100-percent American-made Holeshoot slip-on weighs in nearly 50 percent lighter than the original muffler. Along with a super clean look and perfect fit, it adds about 2 hp, punches up the mid-range torque

and can be installed in less than 30 minutes with normal hand tools. Go to www.holeshoot.com for more.

Fire in the Hole

The E3 DiamondFIRE spark plug features an open, diamond-shaped electrode that offers fuller flame growth and more complete fuel combustion. According to E3, this design accounts for reduced emissions, increased horsepower and better engine durability. Whether it's a motorcycle, snowmobile or ATV, E3 spark plugs' advanced technology helps your machine run stronger. To learn more about E3 spark plug performance, including emissions test results and where to buy, visit www.e3sparkplugs.com

Cooler Heads Prevail

Just in time for warm weather, Coolheadz, Inc., announces a personal cooling unit that fits handily on most cycles and keeps riders' heads cool in the hottest weather. Unlike passive evaporative systems, Coolheadz® is an active system

that pumps iced water into and around your helmet and carotid arteries, and then cycles back into the unit. This lowers the temperature in the helmet, making riding in hot weather a safer and more enjoyable experience. For further information, check out www.coolheadz.net
